AVERY OLMSTEAD

FULL STACK DEVELOPER

ABOUT ME

I have always liked breaking things down, seeing how they work and then try to put it all back together since I was kid. With this always prevalent interest, I have found coding enjoyable to me almost like figuring out a puzzle in a video game to get things to work.

TECH STACK

C#
GitBash/GitHub
Azure Git
HTML, CSS, JavaScript
React
xUnit
SQL
.NET 4.8
MVC

GROUP PROJECTS
GIFFYGRAM

Giffygram is a Vanilla JavaScript Group Project in which my teammates and I built a working web application that enables people post their favorite gifs. We completed this project over the course of a one week sprint. We implemented our learned knowledge of Vanilla JavaScript, HTML5, CSS3, and utilized JSON server as a database along with Git and GitHub for version control to accomplish MVP for this project.

PROJECTS
ANIME WATCHLIST

Weeb WatchList is my Front-end Capstone for NSS I created this React app for anime enthusiasts/watchers like myself to track information like watch status for an anime watcher.

https://github.com/kor0sensei/WeebWatchList-capstone

CAR PARTS PATRON

Car Parts Patron is my Back-end Capstone for NSS I created this .NET MVC app for car enthusiasts like myself to track information like modifications on owned cars

https://github.com/kor0sensei/CarPartsPatron-capstone
